

OCONEE COUNTY PUBLIC WORKS DEPARTMENT

Design Professional's Certification
Storm Water & Flood Plain Management

Project: _____

I, _____, a registered Professional (circle one) Engineer, Landscape Architect, Land Surveyor in the State of Georgia, and qualified by experience and training to deliver professional opinions as to storm water and flood plain management, hereby certify that I have visited the project site and inspected all existing and proposed areas of surface water discharge for both overland flow and concentrated flow of oncoming and outgoing storm water and that the storm water management plan as shown in the construction plans and the hydrology report for the project referenced above dated _____ and inclusive of all design changes have been prepared under my direct supervision, and in my professional opinion, the execution of said plans will not increase the present storm water discharge rate up to the 50-year storm from the site and will not from a storm water discharge standpoint adversely impact proposed onsite improvements, upstream or downstream property owners or existing drainage facilities and will not increase the flood level for any and all storms, up to and including the 100 year storm either upstream or downstream of the project except as noted herein: _____.

I also certify that I have made sufficient visits to the construction site to determine compliance with the plans, specifications, and reports for the project. To the best of my knowledge and belief, the storm water transport and detention facilities for the project have been constructed in substantial accordance with the accepted plans, specifications, and reports and in accordance with Oconee County requirements and accepted design and construction practices, except as noted herein: _____.

Furthermore, in my professional opinion, the construction of the project has not diminished the natural flood storage capacity of the adjacent flood plain if present nor caused any increase in the flood levels of the Base Flood (IRF = 100 year), except as noted herein: _____.

This the _____ day of _____, 20____.
